Agentic BI: Text-to-SQL Analytics

The Agent is securely connected **only** to the masked Gold Database. Ask questions in natural language.

▼  Suggested Analytics Questions (Click to Ask)

What is the total balance for each account type?

Which account type has the highest average balance?

How many accounts exist for each account type?

What is the average balance for each account type?

Which account type has the lowest balance?

What is the total balance for each account type?

Total balance by account type

Account type	Total balance
Checking	327,443.35
Credit	253,098.31
Investment	306,317.51
Savings	475,541.33

These totals are the sum of the `balance` column for each distinct `account_type` in the `transactions` table.

How many accounts exist for each account type?

Here are the counts of accounts for each account type (rounded to the nearest whole number):

Account Type	Number of Accounts
Checking	15
Credit	8
Investment	10
Savings	17

These figures come from counting distinct `account_id` values grouped by `account_type` in the `transactions` table.

Which account type has the lowest balance?
